

If you are considering weakening New Jersey's "Do Not Call" policy, then you must not have been a victim of the numerous telemarketing calls. Calls that are made early in the morning or late in the evening when you think only a family or friend would call at that hour. Do you know what a pleasure it is to answer the phone and not be pestered to buy something? The rights of the people of NJ who have volunteerily signed up should be respected. We have the RIGHT not to be pestered by telemarketers if we ask not to be called.
